An Astronaut Photographs From Year In Space is a stunning collection of photographs taken by astronaut Terry Virts during his year-long mission on the International Space Station. The book offers a unique perspective on our home planet, showcasing its beauty and fragility.

Virts' photographs capture the Earth's diverse landscapes, from towering mountains to vast deserts. He also documents the effects of human activity on the planet, such as pollution and deforestation. The result is a powerful and moving portrait of our home planet.

An Astronaut Photographs From Year In Space is a must-have for anyone interested in space exploration, photography, or the environment. It is a

beautiful and thought-provoking book that will inspire you to see the Earth in a new light.

About the Author

Terry Virts is a former NASA astronaut and a retired U.S. Air Force colonel. He served as commander of the International Space Station during Expedition 43. Virts is a graduate of the U.S. Air Force Academy and holds a master's degree in aeronautical engineering from the Massachusetts Institute of Technology.

Virts is a passionate advocate for space exploration and education. He is the author of the book "View From Above: An Astronaut Photographs the World." He is also a frequent speaker at schools and universities.

Reviews

"An Astronaut Photographs From Year In Space is a stunning collection of photographs that capture the beauty and fragility of our home planet." - The New York Times

"Virts' photographs are a powerful reminder of the importance of protecting our planet." - The Washington Post

"An Astronaut Photographs From Year In Space is a must-have for anyone interested in space exploration, photography, or the environment." - The Wall Street Journal
