## **About the Authors**

The book is written by a team of experts in the field of sustainability. The authors have a wealth of experience in ecological affordable community building, and they are passionate about creating a more sustainable future.

- Dr. John Smith is a professor of sustainability at the University of California, Berkeley. He is the author of several books on sustainability, including "The Green Building Revolution" and "The Sustainable City."
- Jane Doe is a community organizer and environmental activist. She has worked on a number of successful ecological affordable

community building projects, including the creation of a community garden in a low-income neighborhood and the development of a solar energy cooperative.

- John Doe is an architect and urban planner. He specializes in green building and sustainable land use. He has designed a number of award-winning ecological affordable community building projects, including a mixed-use development that combines affordable housing with green features such as solar panels and rainwater harvesting.
