Dr. Greer is a former emergency room physician who has spent decades investigating UFOs and extraterrestrial life. He is the founder of the Disclosure Project, which advocates for the release of classified information about UFOs and alien contact. In *Not From Here*, Dr. Greer presents a wealth of evidence that suggests that we are not alone in the universe.

Dr. Greer begins by examining the latest scientific research on the possibility of extraterrestrial life. He discusses the discovery of exoplanets, which are planets that orbit stars other than our own sun. He also discusses the possibility of life on Mars, Europa, and other planets in our solar system.

Dr. Greer also presents eyewitness accounts of UFO sightings. He interviews dozens of people who claim to have seen UFOs, including pilots, astronauts, and military personnel. He also presents evidence of crop circles, cattle mutilations, and other phenomena that have been linked to UFOs.

In addition to the scientific and eyewitness evidence, Dr. Greer also explores the possibility of cosmic consciousness. He argues that there is a higher intelligence in the universe that is guiding our evolution. He discusses the work of scientists and mystics who have had experiences of cosmic consciousness, and he presents evidence that suggests that we are all connected to a larger, universal mind.

*Not From Here* is a thought-provoking and compelling exploration of the possibility of extraterrestrial life and the search for cosmic consciousness. Dr. Greer presents a wealth of evidence that suggests that we are not alone in the universe, and he offers a vision of a future in which we can live in peace and harmony with our extraterrestrial neighbors.
