

Rescuing Our National Bird, Preventing Cancer, and Creating the Environmental Renaissance

A Book by Dr. Wallace Broecker, the Father of Climate Change

In his groundbreaking new book, *Rescuing Our National Bird, Preventing Cancer, and Creating the Environmental Renaissance*, Dr. Wallace Broecker, the father of climate change, sounds the alarm about the dire threats facing our planet. But he also offers a hopeful message, outlining a plan for action that can save our national bird, prevent cancer, and create an environmental renaissance.

Dr. Broecker begins by discussing the bald eagle, our national bird. Once a symbol of strength and freedom, the bald eagle was nearly driven to extinction by the pesticide DDT. Thanks to the efforts of conservationists, the bald eagle has made a remarkable recovery. However, Dr. Broecker warns that the bald eagle is still threatened by a number of factors, including climate change, pollution, and habitat loss.

DDT Wars: Rescuing Our National Bird, Preventing Cancer, and Creating the Environmental Defense Fund

Dr. Broecker then turns his attention to cancer. He explains that cancer is a preventable disease, and that we can reduce our risk of developing cancer by making simple changes to our lifestyle. These changes include eating a healthy diet, getting regular exercise, and avoiding tobacco smoke.

Finally, Dr. Broecker discusses the environmental renaissance. He argues that we need to make a fundamental shift in the way we think about our relationship with the environment. We need to move from a mindset of exploitation to a mindset of stewardship. We need to learn to live in harmony with nature, and we need to take action to protect our planet for future generations.

Dr. Broecker's book is a wake-up call. He provides a clear and concise overview of the threats facing our planet, and he offers a roadmap for action. This book is essential reading for anyone who is concerned about the future of our planet.

About the Author

Dr. Wallace Broecker is a geochemist and climate scientist who has been called the "father of climate change." He is a professor at Columbia University's Lamont-Doherty Earth Observatory, and he has written over 500 scientific papers and several books. Dr. Broecker is a recipient of the National Medal of Science, the highest scientific honor bestowed by the United States government.

Praise for Rescuing Our National Bird, Preventing Cancer, and Creating the Environmental Renaissance

"Dr. Broecker's book is a must-read for anyone who is concerned about the future of our planet. He provides a clear and concise overview of the threats facing our planet, and he offers a roadmap for action. This book is essential reading for anyone who wants to make a difference." - Al Gore, former Vice President of the United States

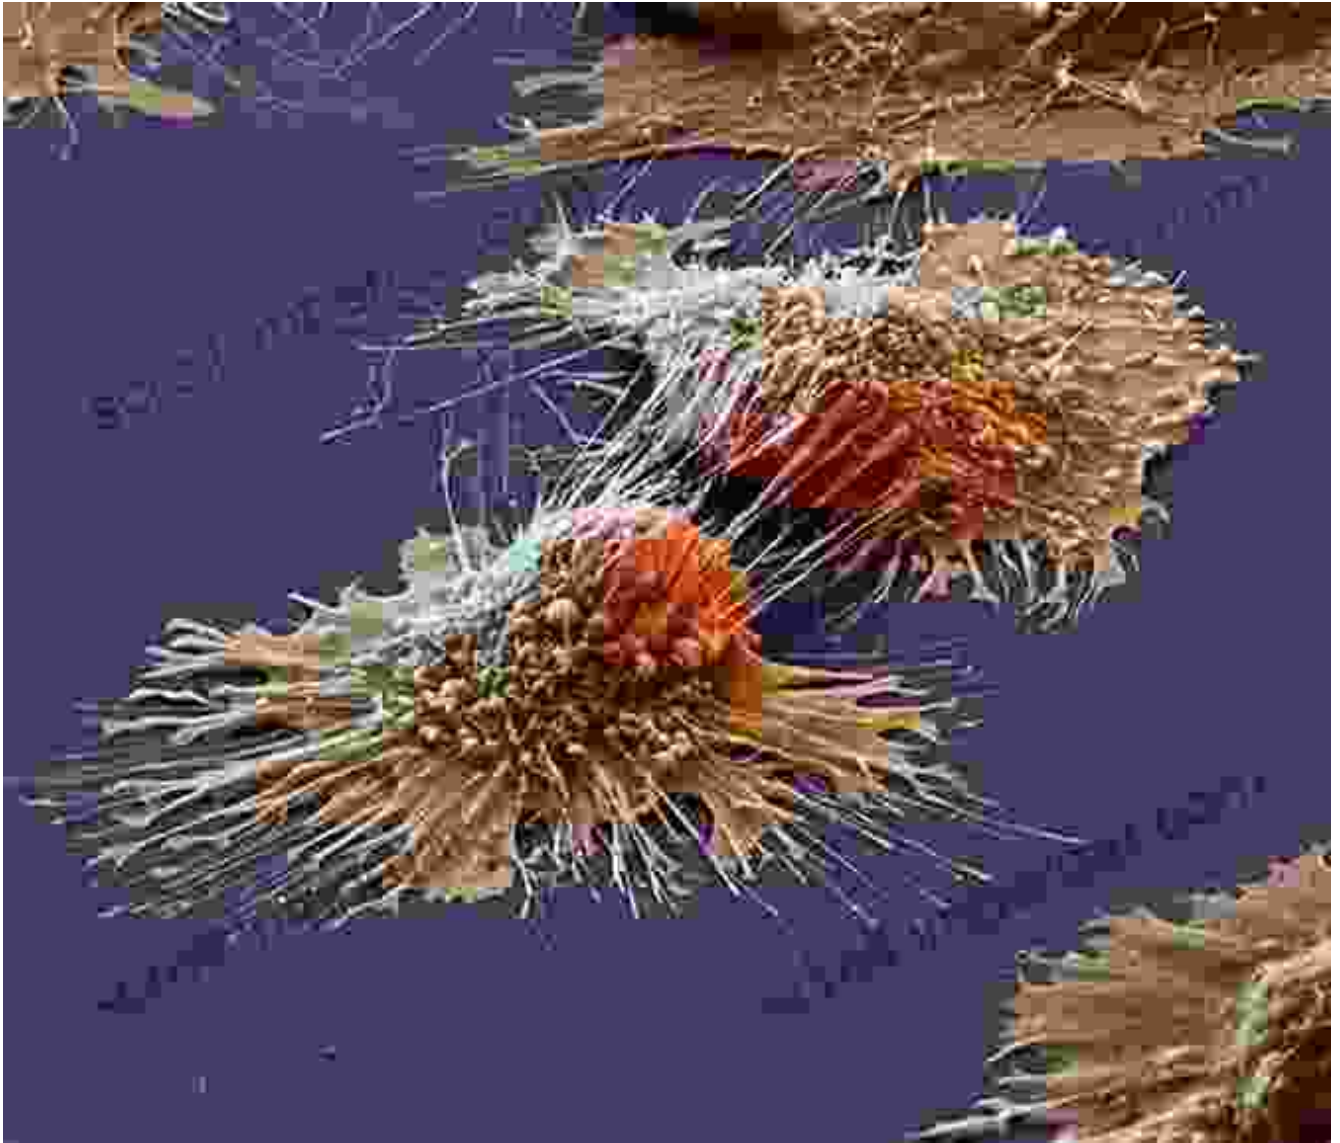

"Dr. Broecker is one of the world's leading experts on climate change. His book is a comprehensive and accessible overview of the science of climate change, and it offers a clear and concise plan for action. This book is a must-read for anyone who wants to understand the challenges facing our planet and what we can do to solve them." - James Hansen, director of the NASA Goddard Institute for Space Studies

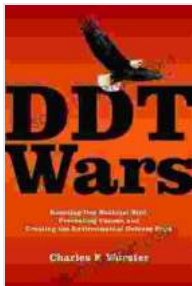

"Dr. Broecker's book is a wake-up call. He provides a clear and concise overview of the threats facing our planet, and he offers a roadmap for action. This book is essential reading for anyone who is concerned about the future of our planet." - Bill McKibben, author of *The End of Nature*
