This book examines the relationship between slavery, indenture, and the environment in the Indian Ocean World. It brings together a team of leading scholars to explore the ways in which slavery and indenture shaped the region's environment, and how the environment, in turn, shaped the experiences of enslaved and indentured people.

The book is divided into seven chapters. The first chapter provides an overview of the history of slavery and indenture in the Indian Ocean World. The remaining chapters examine the specific environmental impacts of slavery and indenture in different parts of the region, including the Dutch East Indies, the British Indian Ocean, the French Indian Ocean, the Portuguese Indian Ocean, and the Indian Ocean slave trade.

This book is a major contribution to the study of slavery, indenture, and the environment. It provides a comprehensive overview of the topic, and it offers new insights into the complex relationship between these two phenomena.
