

# Tigers of the World: The Most Comprehensive Book on Tigers Ever Published

Tigers are the largest and most powerful cats in the world, and they are also one of the most endangered. Tigers of the World is the most comprehensive and up-to-date book on tigers ever published. This magnificent volume presents the most current scientific research on tiger behavior, ecology, and conservation, as well as stunning photographs and illustrations.

Tigers of the World is divided into four parts. The first part provides an overview of tiger biology and ecology. The second part covers the different tiger subspecies and their distribution around the world. The third part discusses the threats facing tigers, including habitat loss, poaching, and climate change. The fourth part presents the latest conservation efforts to save tigers.

## Tigers of the World: The Science, Politics and Conservation of Panthera tigris (Noyes Series in Animal Behavior, Ecology, Conservation, and Management)
