Print length : 704 pages

Elevate Your Practice with Comprehensive Medication Knowledge

As a rehabilitation professional, staying abreast of the latest medication advancements is crucial for delivering optimal patient care. The Davis Drug Guide for Rehabilitation Professionals Davisplus is your trusted companion, providing you with the most up-to-date and evidence-based information on medications commonly used in rehabilitation settings.

Essential Features for Informed Decision-Making

- **Extensive Drug Monographs:** In-depth profiles of over 1,300 medications, including indications, dosages, contraindications, adverse effects, and more.
- **Rehabilitation-Specific Focus:** Tailored to the unique needs of rehabilitation professionals, covering medications used in physical therapy, occupational therapy, speech therapy, and other rehabilitation specialties.
- **Interactive Tools:** Online access to DavisPlus, a powerful medication information database with searchable drug monographs, dosage calculators, and patient education materials.

- **Expert Insights:** Authored by a team of experienced rehabilitation pharmacists and clinicians, ensuring the highest level of accuracy and reliability.
- **Convenient Format:** Available in both print and online versions for easy access and portability.

Benefits for Improved Patient Outcomes

By equipping yourself with the knowledge contained within the Davis Drug Guide, you can:

- **Enhance Patient Safety:** Minimize medication errors and adverse reactions by understanding drug interactions and potential side effects.
- **Optimize Treatment Plans:** Make informed decisions about medication selection and dosages, maximizing therapeutic outcomes.
- **Improve Communication:** Effectively communicate with patients, caregivers, and other healthcare professionals about medication management.
- **Advance Your Professional Development:** Stay current with the latest medication advancements and evidence-based practices.
- **Empower Patients:** Provide patients with accurate and accessible information to promote medication adherence and self-management.
